Roché Mahon

About:

Roché is a national of Trinidad & Tobago and holds an undergraduate degree in Tourism Management and a Masters in Planning and Development with a specialisation in Coastal Zone Management – both from the University of the West Indies. Her PhD work reflects her commitment to advancing current knowledge and practice on mainstreaming disaster risk reduction and climate change adaptation in her region's mainstay tourism industry. Prior to commencing doctoral work under the auspices of a Commonwealth of New Zealand Scholarship at Lincoln University in February 2010, Roché lived and worked in the Caribbean. Through attachments with Lincoln University, the Caribbean Disaster and Emergency Management Agency, the Association of Caribbean States, the Caribbean Tourism Organisation and the University of the West Indies, Roché has worked on a range of sustainable development issues including sustainable tourism, disaster risk reduction, climate change adaptation, risk communication, planning and development, public policy, institutional building and capacity development.

Position: PhD Candidate at Lincoln University.

Details: Currently a PhD candidate at Lincoln University, Christchurch, New Zealand pursuing doctoral work that seeks to help us to better understand what types of climate related adaptation interventions are thought to be most useful in the coastal tourism sector of small-island Caribbean states.

Title: Evaluating the business case for investment in the resilience of the tourism sector of small island developing states

Author: Mahon, Roche
Becken, Susanne
Rennie, Hamish

Date: Feb-2013

Publisher: Lincoln University. LEaP.

Citation: Mahon, R., Becken, S., & Rennie, H. (2013). Evaluating the Business Case for Investment in the Resilience of the Tourism Sector of Small Island Developing States. A Background Paper Contributing to the Global Assessment Report on Disaster Risk Reduction (GAR) 2013. LEaP Research Report No. 32. Christchurch: Lincoln University.

Series/Report no.: Land Environment and People Research Report; no. 32

Item Type: Monograph

Abstract: Over the last decade, a number of disasters severely affected tourist destinations. At the same time, the management of disasters has shifted from a reactive, top-down approach to a more inclusive approach that seeks to proactively include the private sector in reducing the risk of disasters. Considering that a significant proportion of tourism occurs in the potentially hazardous coastal zones of Small Island Developing States (SIDS), private tourism sector stakeholders can – and maybe have to – play an active role in disaster risk reduction (DRR). Establishing the business merits associated with investment in disaster resilient measures would be necessary to support increased private sector DRR investment. This study therefore evaluated the business case for investment in the resilience of the tourism sector in SIDS. As such, it offers: 1) a greater understanding of the root causes of destination vulnerability and risk using a cross-regional, comparative case study approach; and 2) a qualitative evaluation of the business case for investment in the resilience of SIDS tourism. Semi-structured interviews with 80 private and public sector stakeholders in the Caribbean, Pacific and AIMS regions revealed that some private sector stakeholders already self-regulate based on individual evaluations of a variety of tangible and less tangible benefits. More research is needed to develop the economic and financial data that may possibly encourage greater private sector investment in DRR, as well as, create a supportive and enabling national economic context for resilient tourism investment.
